👤 PROFILE

I am having 3+ hands-on experience as a devops engineer and cloud specialist with String expertise in **Azure** and **AWS cloud**, Infrastructure as a code (IAC), and secure CI/CD implementations. Proven ability to design, implement and optimize scalable, secure, and automated cloud solutions using modern Devops and devsecops practices. Experienced in integrating security across development lifecycles using tools like **Terraform**, **Azure Pipelines**, **Github Actions**, and security tools such as **Tfsec**, **TFLint**, and **Terratest** along with monitoring application using Grafana, Azure monitor, Dynatrace and OpenTelemetry. Adept at driving cloud transformation initiatives and enhancing deployment efficiency in enterprise environments.

🏢 PROFESSIONAL EXPERIENCE

Devops Engineer
NuSummit
Project - OFS (Offer-for-sale) - NSE India LTD.

03/2026 – Present | Gurugram, India

- Implemented **Docker and Kubernetes (AKS/EKS)** for container orchestration, managing Deployments, Services, Ingress, ConfigMaps, Secrets, and HPA to ensure scalable and highly available applications.
- Automated **CI/CD pipelines** for containerized applications, integrating Docker image builds, container registries, automated deployments, caching, parallel execution, and artifact management to reduce release time.
- Automated cloud infrastructure provisioning using **Terraform reusable modules**, while implementing **IAM, Kubernetes RBAC, and secrets management** to improve security and eliminate configuration drift.
- Established **monitoring, logging, and alerting** using Azure Monitor and Kubernetes monitoring, enabling proactive detection of application, pod, and infrastructure issues.
- Troubleshoot and optimized **Kubernetes, container, and production environments**, resolving deployment, pod, networking, and resource-related issues while collaborating with development, QA, and security teams to improve release cycles and application reliability.

System Engineer
Tata Consultancy Services
Project - **iMobile pay (ICICI Bank)**

10/2023 – 03/2026 | Noida, India

- Designed and implemented scalable cloud infrastructure on Azure using Infrastructure as Code (IaC) with Terraform, improving provisioning speed and consistency across environments.
- Built and optimized secure CI/CD pipelines using Azure Pipelines and GitHub Actions, enabling faster and reliable application deployments with reduced manual intervention.
- Integrated DevSecOps practices into the development lifecycle by incorporating security tools such as **Tfsec, TFLint, TruffleHog, and Super Linter**, ensuring early detection of vulnerabilities and compliance issues.
- Led cloud transformation initiatives by migrating and modernizing applications to cloud-native architectures, enhancing system scalability, availability, and cost efficiency.
- Monitored and optimized cloud resource utilization using tools like OpenCost, resulting in better cost visibility and optimized cloud spending.

🎓 EDUCATION

B.Tech (Computer Science & Engineering)
Dr. A.P.J. Abdul Kalam Technical University, Lucknow

2019 – 2023 | Lucknow, Uttar Pradesh

🛠️ TECHNICAL SKILLS

IAC Terraform	Cloud Providers – Competent AWS (amazon web services), Microsoft Azure
Source Code Management – Competent Git (Github, Azure Repos)	DevSecOps and Security Tools – Competent Tfsec (Terraform security scanning), TruffleHog (secret detection), TFLint(Terraform Linting), Super Linter (code quality), Terratest (IaC testing), OpenCost.
CI/CD – Competent Azure Devops, Azure Pipelines, Github Actions	Scripting PowerShell, Bash
Monitoring Tools: – Competent Grafana, Azure Monitor, Logs etc.	

🏆 CERTIFICATES

AWS Solution Architect
AWS Cloud Practitioner

01/2025 – 01/2028 | Indian
